Osprey Spill Control Cleans And Greens The Environment

Virginia Beach, VA – MGM Strategies dba Osprey Spill Control (OSC) is dedicated to creating a cleaner planet by cleaning our oceans, fresh water rivers and streams of all hydrocarbon pollution from oil spills. Osprey Spill Control specializes in aiding in the recovery of oil and other hydrocarbon-based liquid products using their cutting edge technologies and their Osprey Sorbent Products, which are 100% biodegradable, non-corrosive and non-toxic, and safe to plants, animals and people.

Osprey Spill Control is a Platinum level member of the Green Business Bureau, which is a national membership organization that uses an online assessment to certify green businesses. Recently, OSC's commitment to a sustainable future led them to green their offices by incorporating the Neat Document Organizer, which reduces paper and ink consumption. OSC reports that their customer relationships have improved significantly since they transitioned to an eco-friendly office environment that matches their non-toxic and biodegradable product line. Moreover, the reduction in the company's energy and paper usage lowers costs by creating a more effective and efficient process for developing literature and processing corporate documents. OSC's smart green strategy proves that sustainability is not only good for the planet but also for the bottom line.
